Public Meeting in Oyen Theatre

"How to Solve the Depression Problem" subject of address by A. C. McKay of Calgary

Lorne Proudfoot, M.L.A., present

Oyen Theatre was crowded to the doors last Wednesday to hear speakers talk on the subject "How to Solve the Depression Problem." Mr. Howard Stutchbury, Trade Commissioner, one of the speakers advertised to be present, was unfortunately unable to attend owing to sickness, but Mr. A. C. McKay secretary, Retail Merchants' Association, very ably carried on.

The theme of Mr. McKay's address, was buy "Made in Alberta" goods, in preference to goods made elsewhere. He did not ask his hearers to spend more money than they were already present, but when they did spend, to buy Alberta made products in preference to similar products made elsewhere, quality and price being taken into due consideration. He gave an interesting array of statistics of the amount spent annually by Albertans for many commodities, and showed very concisely

(Concluded on page 2.)

Ministers of Drumheller Presbytery Pay Visitation to Oyen

"The Church in Action" was the subject of addresses delivered in Oyen United Church, last Thursday, when three ministers of the Drumheller Presbytery, paid a visit to Oyen.

In the afternoon an address to the ladies of the various church organizations, was delivered by Rev. Donald MacGregor, Youngstown, on the subject of "The Women of the Church in Action."

Following the afternoon session, a supper was served in the church basement to all officials of the church, and after a very enjoyable repast, Rev. R. W. Griffiths, Craigville, gave an address on the "Sunday School in Action." This was followed by an address by Rev. J. D. Woodluff, Ceresol, on "The Official Board in Action."

After a short recess, two addresses were delivered in the church auditorium. The first "The Young People of the Church in Action" by Rev. D. MacGregor and second "The Whole Church in Action" by Rev. R. W. Griffiths.

Rev. E. F. Kemp, who very efficiently acted as chairman, expressed the thanks of the church officials and congregation, to the visiting delegation. The meeting had proved most enjoyable and the inspirational messages had been appreciated.

Grain Storage Charges Lowered

Storage charges for grain in western grain division are now 1-45th of one cent a bushel per day, instead of 1-30th a cent a bushel per day previously charged. The new rate, which went into effect Monday is applicable at all terminal elevators at Fort William and Port Arthur and terminals at the Pacific Coast as well as at country elevators in the prairie provinces.

Herman Trelle Wins Wheat Championship For Fourth Time

Herman Trelle of Wembley, Alta., was awarded the wheat crown at the International Livestock Exposition and Hay and Grain show at Chicago, Monday. This is the fourth time Trelle has been crowned wheat king. Last year, with his third win, he took permanent possession of the trophy donated by the Union Stockyard and Transit Company of Chicago.

Here is the record of Trelle's wonderful successes at the international show:

1926—Wheat and oats king, double title.

1927—Oats title; reserve wheat championship.

1928—Field peas title; reserve wheat championship.

1929—Did not exhibit, owing to illness.

1930—Wheat title, peas championship.

1931—Wheat title, peas championship.

1932—Wheat title.

Canadian exhibitors, made a clean sweep of all but five places in the hard red spring wheat awards at the international show, capturing 59 of the 65 places before a state exhibit scored.

Alberta's Winnings at Toronto Royal Fair

The 1932 royal winter fair at Toronto will go down into history for Alberta as the most notable thus far, for winnings by exhibitors in live stock and grains from this province. Some 26 championships of all classes, including four grand championships, more than 60 first prizes, and a long list of seconds, thirds and fourths, was the record established. The seed oats championship was won by Paul Sebastian of Wembley. In beef cattle, the province's wins were outstanding. In carlots of steers, first and second places were won by Alberta exhibitors. In turkeys all first prizes went to Alberta exhibitors.

PROPOSAL FOR WORLD WHEAT POOL ADVANCED

Calgary, Alberta.—Virtual establishment of a world wheat pool, on a voluntary basis by the four leading wheat exporting countries, was urged before the Alberta wheat pool annual meeting here by C. W. Peterson, publisher of the Farm and Ranch Review and leading farmer expert of western Canada.

Mr. Peterson's address was given at request of delegates during discussion of general wheat production and exporting problems.

Mr. Peterson's proposals, mentioning specifically the wheat exporting countries of Canada, United States, Australia and Argentina, briefly were:

1. To organize the four chief wheat exporting countries into a pool to control, within each country, the domestic and export sale of wheat and flour.

2. To induce importing countries to agree to a fixed, uniform price of a specified grade of wheat at Liverpool.

3. By creating a state monopoly of the wheat and flour business, or by any other feasible method, to facilitate the proper enforcement of such a price within all countries.

Elaborating his proposals after addressing the closed meeting of pool delegates, Mr. Peterson reviewed history of agriculture for the past 300 years, leading up to present world conditions. He presented a picture of farmers in Canada, United States, Australia and Argentina to guarantee against over-production with a form of international control.

"Thinking people," he said, "can easily comprehend the sequence of events leading up to present conditions." The first step, he said, was universal agricultural control arising from inflated war prices. The second was culmination in unprecedented agrarian price demoralization, bringing the temporary subsiding of farmers in all exporting and most importing countries to a slump standard of living. The final was present chaos.

Mr. Peterson's plan called for establishment of a "joint international wheat board," which would become responsible for marketing of all the wheat and flour produced in the four countries.

Each of the four countries would, by the joint international board, be allotted an acreage quota annually, based on current world requirements. Normally, he said, this would vary somewhat, but would expand sympathetically with carryovers, increases in world population and planting intentions in other countries. Special quota allowances might have to be accorded Australia and Canada in view of their comparatively undeveloped state to provide for new settlement. The proceeds of this acreage, based on the season's yield in each country, would be accepted for export sale. No more than the quota would be taken.

Church Union

Australian Making Study Of Church Union System In Canada

Ottawa, Ont.—"I don't think there is any chance of stopping union," declared Lieut.-Col. the Rev. A. T. Holden, D.D., president-general of the General Conference of the Australian Methodist Church, and chairman-general of the Australian military forces, who was a visitor in Ottawa. Col. Holden is making a trip across Canada for the sole purpose of studying church union so it exists in this country, so that he can put forth proposals in his own country for the union of churches.

Going To New Diocese

Vancouver, B.C.—Rev. A. H. Sovereign, bishop of the Yukon, who is relinquishing his work in the far north to take charge of the diocese of Athabasca, will leave Dawson in March, according to word received here. Bishop Sovereign will arrive in Vancouver early in April and after a short stay here, will proceed to Prince Albert to commence his new work.

Would Improve Bacon Hogs

Toronto, Ont.—Advocating a higher quality of bacon hogs to meet the demand of the Great Britain consumer, Hon. Robert W. Hamilton, Minister of Agriculture, addressed several hundred farmers and exhibitors at the Royal Winter Fair luncheon recently.

Many Questions On Beauharnois Project

Matter Is Again On Ottawa House Order Paper

Ottawa, Ont.—The Beauharnois power project again figures in questions placed on the order paper of the House of Commons. E. J. Garland, United Farmer member for Bow River, has a dozen queries on the order paper in view of obtaining further information in respect to the financing of the undertaking.

Mr. Garland first asks for the tabling of copies of any arrangements which have been entered into by the government in respect to the Beauharnois project. He wishes to know the total amount of money advanced by the government to date in connection with the construction and completion of the enterprise.

"What security has the government been given for the money advanced?" he asks.

The member for Bow River asks if the government has obtained any legal opinion regarding the legal right of the Beauharnois Electrical and Power Company to transmit electrical energy beyond the limits and boundaries of the province of Quebec.

"Did the minister of finance or the prime minister approve of loans estimated at \$5,000,000, made by the Royal Bank of Canada, the Bank of Montreal, and the Canadian Bank of Commerce to this enterprise?" he asks.

Are such loans permissible under the Canadian Bank Act?

For Better Understanding

Makes Plea For Closer Union Between Britain and U.S.

London, Eng.—Speaking at a Pilgrimage Society luncheon in honor of Robert Fraser, the new United States consul-general, Lord Hallahan, Secretary for War, made a plea for closer union between Great Britain and the United States for the economic salvation of the world.

"Never has there been a time when it was more important that our two peoples should understand one another," he said. "We stood together in arms to protect civilization from violent destruction. I believe that today we, the two great creditor nations of the world, must stand together to protect the world from economic disaster. I believe that the hope of civilization lies in our understanding better one another."

Attack Duff Report

Labor Makes Attack On Its Recommendations

Ottawa, Ont.—Thousands of railwaymen throughout Canada will be thrown into the ranks of the non-unionized if the Duff commission's report is adopted, the House of Commons was told when Labor made its initial attack in recommending the Humphrey Mitchell, Labor, Hamilton East, estimated 20,000 railwaymen would lose jobs. Hon. Peter Henderson, who returned to Ottawa in a locomotive cab when he left the portfolio of Labor in the King cabinet, placed the number at "many thousands and thousands."

Branch railway lines would be scrapped, noted the former minister. Services would be dropped and curtailed. The Canadian National and Canadian Pacific Railways would be drawn into closer co-operation. Competition would disappear.

Alberta Deficit

Decreased Revenues Shown In Provincial Treasurer's Report

Edmonton, Alberta.—Deficit of \$5,153,000 in Alberta provincial finances for the fiscal year ended Mar. 31, 1932, is shown in public accounts released by Hon. R. O. Reid, provincial treasurer. This compares with a deficit of \$2,306,581 for the previous fiscal year, 1930-31.

Revenue for the fiscal year which had been estimated at \$18,441,457 actually yielded \$13,492,430, a shortage of nearly five millions, expenditures were estimated at \$13,828,798, but were cut to \$13,495,481.

Seen Better Times

Toronto, Ont.—President Frank A. Rolph told the annual meeting of the shareholders of the Imperial Bank of Canada here today that there is a slender feeling of optimism throughout the country than there has been for two years, that opportunities are offered for developing business due to the imperial economic conference, and that further stabilization may be expected from the coming world economic conference.

Oil From Oklahoma

Trainload Of Crude Oil Leaves Seminoe For Regina

Seminole, Okla.—A trainload of 40 cars of crude oil will leave here for the Imperial Oil Company, Regina, Sask.

The train will provide 120 working days for railway employees in Canada and the United States. The railroad men call it the "King George Special." It is the first trainload of Seminoe crude oil to be shipped to Canada in months. There used to be three a week.

MORE DIVERSITY OF PRODUCTION ON THE FARM

Toronto, Ont.—Radical changes are required in western Canadian agricultural practices before the prairie provinces' economic picture is again bright, in the opinion of a group of Toronto bankers official of the "Mail and Empire."

Just returned from a month's intimate study of conditions and prospects in the west, the bankers advocated turning the bulk of Manitoba's wheat lands into grass for cattle. That, he suggested, would permit Saskatchewan areas suitable for wheat alone to retain this as a major crop without congesting the market.

Alberta, he stated, already was well on the way toward a more balanced production. However, greater interprovincial co-operation was required before the problem finally could be solved.

There must, in the bankers' opinion, be drastic curtailment of wheat acreage in western Canada, and he suggested the best method of attaining it would be through interprovincial co-operative measures tending toward a planned and co-ordinated system of production, allocating to each area the crops and types of livestock it was best fitted to produce.

Western Canada could not get along with general comfort throughout all its sections so long as wheat prices at Port William were less than 60 cents a bushel. Reservations already made had placed the average farmer less than 100 bushels of wheat or with wheat at 60 to 65 cents as he was three years ago when it was selling at 52.

Some communities and individuals acted as organizers of production they were doing well with 50-cent wheat, the banker stated. Others in such areas as southeastern Saskatchewan had not yet exhausted their cash surplus from former years. Thus, there was by no means a uniform condition throughout the west. Bright spots were sufficient in number and variety to mitigate the gloom cast by others.

ITALY PASSES TENTH MILESTONE UNDER FASCISM

Since that October day ten years ago, when the black-shirted legion, led by an almost unknown agitator, Benito Mussolini, marched into the Eternal City and started Italy on its comeback to greatness, many changes have taken place in the land of the Caesars and Popes. The most remarkable of these changes, to the looker-on, has been the climb to power of Mussolini. His word is law by every corner of the country. He is hated by many, feared by many, adored by many—but obeyed by all. Fascists claim that Di Iuse has built up the economic structure of Italy to a position it has not enjoyed for decades.

NEW AMBASSADOR

Herr Von Hoesch, German Ambassador to Ottawa, is shown above as he arrived in the British Capital.

New Bacon Policy Will Benefit Canada

British Markets More Open Than Ever For Product

Toronto, Ont.—Canada will benefit automatically in the new policy by reason of the 280,000,000 pounds of bacon per year," declared J. S. McLean, of Canada Packers, Limited, in commenting on Great Britain's policy with regard to bacon restrictions which are now in effect.

"Her market will now be more open than ever to receive this Canadian bacon, which will take care of about 50,000 hogs a year."

Great Britain has started cutting down on her imports of bacon from foreign countries. She is doing this essentially as a preliminary to building up her production.

May Demand Provincial Election In Ontario

Progressive Leader Will Introduce Amendment When House Opens

Toronto, Ont.—A demand for a provincial election next summer will be made immediately after the opening of the Ontario legislature in February by H. C. Nixon, Progressive Leader, who was in Toronto.

He declared he would introduce an amendment to the moving and seconding of the adoption of the Speech from the Throne demanding the building of the House be concluded with a reasonable speed and an election called for June next.

Relief On Mortgage Payments Is Sought

One Per Cent Interest Cut Asked By Prairie Provinces

Ottawa, Ont.—Efforts to free prairie farmers for one year from mortgage interest and to persuade mortgage companies to reduce interest rates by one per cent, were put forward last week by western provincial treasurers in an interview with officials of these companies.

The interview, it is understood, took place at Toronto, and the reply given the treasurers is not known here. It is understood, however, that the companies pointed out that few if any foreclosures are being sought for arrears of interest, and that the companies are dealing generously with farmer debtors on the prairies.

New Stamp Issue

Bears Profile Of King Engraved In Medallion Style

Ottawa, Ont.—A new stamp issue, in denominations of one, two, three, four and eight cents was placed on sale by the post office department on December 1.

The new issue bears the profile of the King, engraved in medallion style, and is similar in design to the 3-cent stamp issued to commemorate the Imperial Economic Conference. At the same time a new 13-cent stamp will be issued replacing the current 12-cent stamp that bears the view of the Quebec capital. The design of the new stamp will be the same as that of the 12-cent issue, but its colour will be violet.

No Jobless In Jerusalem

Not One Man Unemployed Statement Of Jewish Leaders

New York.—Three Jewish leaders from Palestine, arrived on the "Berengaria" on their way to a convention of the American Mischai organization in London, boasted that there is not one unemployed man in the Jewish population in Jerusalem. One of them, Arnan Ben-Nun, said the Jewish population in Jerusalem has grown from 50,000 in 1917 to 220,000 today.

U.S. IS AGAINST MOVE FOR DEBT CANCELLATION

Washington.—Climaxing a rapidly moving picture of war debt discussion, President Herbert Hoover launched today with the knowledge of President-elect Franklin D. Roosevelt—a request for foreign debtors meet the December 15 payments on their war debts to the United States.

Simultaneously and in the face of congressional opposition, he proposed legislative creation of an agency to handle international financial policy in connection with world economic and disarmament problems.

In view of determined objections made on Capitol Hill, especially by Democratic voters in the House, there seems little chance for such a United States commission.

Only a few minutes before Mr. Roosevelt left Washington and shortly after an extraordinary convocation of congressional leaders at the White House, Mr. Hoover issued a lengthy formal statement declaring flatly against debt cancellation but suggesting other forms of tangible compensation than cash.

Immediately there followed a chorus of mixed approval and opposition. The senator and representative after another declared against a commission to review the debts. The same men, however, expressed approval of Mr. Hoover's stand against further moratorium or cancellation.

Some congressional leaders told conference that he already had power to negotiate or set up a commission such as he proposed to negotiate with Great Britain, France and other European powers. The same view was echoed later by other prominent members of congress who did not attend the meeting but in administrative quarters it was held the executive had no such power.

Speaker John Nance Garner, the vice-president-elect, who led the Democratic contingent into the cabinet room conference at the White House, and later into parity with Mr. Roosevelt, reiterated in public belief expressed by several at both meetings.

Let them default," he exclaimed in answer to questions. "Who said they would default? They won't."

MASS KILLING OF CHINESE BY JAP SOLDIERS

Shanghai, China.—A Chinese foreign office communication published here charged that 2,700 Chinese peasants were massacred recently in northern Manchuria by Japanese troops.

The mass killing was done by machine guns, the communication said. Inhabitants of the villages of Ping-Ting Shan, Chien-Ching and Liao-shan, 10 to 16 miles northeast of Peking, were assembled in a ditch west of Ping-Ting Shan while Japanese soldiers searched the villages for Chinese volunteers, the announcement said. It was explained that the villagers were suspected of co-operating with and harboring the volunteers.

According to the Chinese foreign office, the Japanese promised a reward if the villagers were found to be innocent, and then placed more than 10 machine guns 70 yards from the assembly, ordering all the captives to kneel with their backs to the guns.

Some of the villagers realized the fate in store for them, the communication said. If the villagers were found to be innocent, and then placed more than 10 machine guns 70 yards from the assembly, ordering all the captives to kneel with their backs to the guns.

"Infants, children and others not killed by bullets were bayoneted," the statement said.

Subsequently, according to the communication, the farms of the villagers were allotted to Japanese nationals.

Talked Over Light Beam

Scientist Make Longest Narrow-Beam Experiment On Record

Schenectady, N.Y.—A group of scientists at Schenectady talked with another group at Lake Desolation, 24 miles away, over a light beam projected across the lower Adirondack mountains. The longest narrow-casting experiment on record, during a part of the experiment John Bellamy Taylor, physicist, transmitted sound over light waves. The experiment was conducted by a newspaper columnist, who was at Schenectady, while Taylor was at Lake Desolation.

A searchlight mounted on a building at the General Electric Company's plant projected his beam upon a 30-inch searchlight at the other end of the receiving apparatus at Lake Desolation.

For National Defence

Conference Of Defence Association Has Been Established

Ottawa, Ont.—Organized for the purpose of considering problems of national defence, co-ordinating the activities of the present service associations in matters of common interest, and generally promoting the welfare of the defence forces of Canada, the conference of defence associations has just been established. The conference will meet annually in Ottawa.

The chairman is Col. J. A. Gipe, D.S.O., M.C., of Lethbridge, with Lieut.-Col. A. W. Bennett, V.D., Ottawa, secretary.

New Sheep For West

Toronto, Ont.—Production of a new breed of sheep particularly adapted to conditions on western ranges which would provide the quality of wool desired in Canada as well as mutton and meat for food was forecast at the fifth annual meeting of the associate committee on wool of the National Research Council.

Reducing Liquor Prices

Victoria, B.C.—Reductions in liquor prices on all native continental European brands, ranging from 10 to 25 per cent, went into effect in British Columbia December 1, Hon. R. H. Pooley, attorney general, announced. The government has seen given the new price list prepared by the liquor control board.

English Heirlooms

Royal Commission On Historical Monuments Busy Taking Inventory

If there are any who imagine that the auction rooms have made a clearance of the historic treasures of England, they may reassure themselves. Prodigious as the sales have been in recent years, they have but "scratched the surface" of the United Kingdom's savings from the centuries. Ample evidence of this is furnished in the inventory, so far as it has proceeded, of the royal commission on historical monuments. Appointed by King Edward 24 years ago the commission has to date made a survey only of London and of five counties. The war and the lean times following are in part responsible for the seeming slowness of progress, but even more so has been the laborious care taken by the commission in every detail of its work.

Roman camps and earthworks, churches and castles, cottages and manor houses, monasteries and market halls—nothing small or great in building or furnishings which was in existence before the year 1714 has escaped minute inspection. Charged to discover "those things which seem most worthy of preservation," the commissioners of Edward VII. and George V. in thoroughness and energy put to the blush the commissioners of Henry VIII, who made a more sinister visitation of England's abbots and monasteries.

Fifteen substantial volumes in quarto record the results achieved so far. Even the smallest of the hundreds of photographs is a work of art. How stupendous was the amount of material which would be examined may be gathered from the fact that it was necessary to devote an entire volume to Westminster Abbey alone. Roman remains in London took another volume, a third was devoted to the city proper, a fourth and fifth to east and west London. Essex, Huntingdonshire, Hertfordshire and Herefordshire are considered in other volumes. Some of these are already out of print.

There has just been published the report upon east Herefordshire. One of the most smiling of the English abbeys, its relics of past centuries now under notice range between a beacon camp on "Malvern's lonely height"—constructed when the Crucifixion was an event of the far future—and the most interesting specimens of a public building of three centuries ago.

Even more gracious is the half-timbered market hall of Ludbury. The churches of east Herefordshire, of course, have yielded an abundance of material. Consider also their smaller possessions, and one is tempted to speculate—cautiously in London—on speculation on what they would "fetch" if they found their way to Christie's. Points in which the facts were being digested "with care and wary," let us hope, when Becket was slain in Canterbury Cathedral; communion cups and fragers in use when the 28 articles were drafted; poppets owned by preachers who had talked with Archbishop Laud; bells which rang the alarm of the Spanish Armada; richly carved stone ways trodden by children of men who fought at Agincourt; oaken doors of manor houses which opened to gay cavaliers and to Cromwell's Ironsides! That England still holds for herself a vast treasure of the past is amply demonstrated when even this one volume is opened.

The chairman of the royal commission is the Earl of Crawford and Balcarres.

Complete Soil Survey

Classifying and Mapping Soils In Saskatchewan

After 11 years of work, involving over 120,000 miles of travel, Saskatchewan's soil survey is completed, according to announcement made by officials of the soils department of the University of Saskatchewan, in charge of the work.

In 1920 members of a better farming conference at Swift Current urged a survey of the soils of the province to classify and map the soils so as to encourage and assist the development of oil types by systems of farming to which they were best adapted.

A soil map of the western half of the province has been completed, showing the many soil types, and field work of the present season brings to near completion the reconnaissance soil survey of the more settled part of Saskatchewan.

On the world's longest air-line run to Japan, a distance of 9,000 miles, the fare is \$188.10.

W. N. U. 1970

Game Conservation

Alberta Fish and Game Association Asks For Grant

A \$5,000 grant to be used chiefly in conservation of wild life was sought from the Alberta Government by the Alberta Fish and Game Association in annual convention at Lethbridge. The association suggested the grant be made to the association from revenue derived through sale of hunters' and fishermen's licenses.

A resolution adopted by the delegates asked the Alberta and Dominion governments through their parks departments to undertake destruction of coyotes, wolves and other animals which are killing deer in large numbers within the park boundaries. Bird sanctuaries at Many Island Lake, Chin Lake, Shanks Lake and Kirkpatrick Lake were proposed.

Only one suggestion was made in connection with hunting of game birds. This was a recommendation for an open season of one week be provided on ruffed grouse, north of the North Saskatchewan River, with a limit of five birds a day and 15 for the season.

Norman Fraser, Edmonton, was elected president for the next two years, and the next annual meeting will be held in August, 1933, at Edmonton.

Trade With China

Canadian Representatives Have Taken Up Duties In Orient

Special representatives of the Department of Trade and Commerce have taken up location in China. Premier R. B. Bennett made this statement in the House of Commons.

The Prime Minister has been asked by the Chinese government the advisability of appointing a special representative to China so as to facilitate trade relations. Thomas Reid, Liberal member for New Westminster, put the question. He said that "in view of the fact that Chinese officials have been asked to meet Hon. Herbert Martin, Canadian Minister to Japan, the appointment of a representative was increasingly important."

Mr. Bennett replied that provision had been made within the past 12 months for special representatives of the Department of Trade and Commerce to take up location in China. They had undertaken their duties there.

Boosting World's Grain Show

Preparing For Biggest Grain Show In History Of The Continent

The buildings have been erected on the Regina Exhibition grounds, and preparations are now being made for the biggest grain show in the history of the continent. The whole world is interested and every grain country on the face of the globe will have exhibitors in Regina. No other place for the show could be chosen than the Queen City of the West, situated in the centre of what is normally the greatest wheat growing country in the world. It is also almost the geographical centre of the Prairie Provinces, or that is in Regina. No other place for the show could be chosen than the Queen City of the West, situated in the centre of what is normally the greatest wheat growing country in the world. It is also almost the geographical centre of the Prairie Provinces, or that is in Regina. No other place for the show could be chosen than the Queen City of the West, situated in the centre of what is normally the greatest wheat growing country in the world.

Government May Remove Some Dumping Duties

Certain Imports From Great Britain Are Under Consideration

The Canadian Government is giving "serious consideration" to removal of exchange dumping duties on certain imports from Great Britain. This was announced in the House of Commons by Hon. H. H. Stevens, Minister of Trade and Commerce.

Canada professed "sympathetic consideration" under the Anglo-Canadian treaty to removal of currency dumping duties from British imports.

Even Before Adam

A modest Scotsman, in speaking of his family, said:

"The Douglas family is a vera, vera auld Scotch family. The line runs aw' back into antiquity. We dinna ken how far back it runs, but it's a lang, lang way back, and the history of the Douglas family is recorded in five volumes. In about the middle of the third volume, in a marginal note, we read, 'About this time the world was created.'"

Berlin has introduced travelling grocery stores which stop at specified places for housewives to make their purchases.

BRITISH LAWN TENNIS TEAM LEAVES FOR AFRICA

Here are the members of the British Lawn Tennis team leaving London, England, for South Africa. They are left to right: Fred J. Perry, G. P. Hughes, Miss Betty Nuttall, Mrs. Fearnley Whittingall (formerly Eileen Bennett), Miss Mary Healey and H. G. N. Lee.

Clouds Are Depressing

Most People Feel Dependent When Sun Does Not Shine

Everyone has the blues this morning. The sky caused it, for when we first awoke that ceiling was overcast with a dim greyish mist that filtered the sun's light weakly and slowly. And then, about noontime, there came a rift in the sun's clouds overhead, and suddenly the sun came through the gloom and flooded the streets below. And with its coming our little world sprang into sudden activity. The figures in the street seemed to move more energetically; the bustle of city traffic began to flow.

And then, about noontime, there came a rift in the sun's clouds overhead, and suddenly the sun came through the gloom and flooded the streets below. And with its coming our little world sprang into sudden activity. The figures in the street seemed to move more energetically; the bustle of city traffic began to flow. And then, about noontime, there came a rift in the sun's clouds overhead, and suddenly the sun came through the gloom and flooded the streets below. And with its coming our little world sprang into sudden activity.

I thought later—how little it takes to sink us mortals into the depths of despondency. The sun refuses to come in the morning; a few mists close a station; frightens the brokers—and phuff! we are lost in despair!

But, sooner or later, the sun is sure to break through the clouds of doubt and worry. And we are all going to wonder, then, how it was that we allowed ourselves to become so discomfited and morbid.

Cheer up! In a very short while it will seem very funny that for a short time the sun forgot to smile.—Nelson B. Bond.

Technical Agriculturists

Canadian Society To Meet In Regina

In July the directors of the Canadian Society of Technical Agriculturists, meeting in Toronto, has accepted the invitation of the south Saskatchewan branch of their society to hold the annual convention at Regina during the first week of the World Grain Exhibition and Conference, July 24-31. An extensive programme of technical papers on scientific subjects pertaining to production of grain of all kinds is being planned.

Hair will stretch one-fourth of its length and retract nearly to its original length.

Second Hand Airplanes

Brisk Demand Reported In England For These Machines

Though it is certainly a sign that aviation is becoming part of the humdrum life of the country, flying enthusiasts may not be quite elated to know that second-hand airplanes are now for the first time coming on the market. The majority of these machines are light two-seater type and probably cost when new anything up to \$800 each. They are now offered second-hand, but apparently in perfectly good trim, for anything between \$200 and \$400. Most of these machines are being put on the second-hand market by owners who have either found that the running and maintenance costs were greater than they anticipated, or whose first enthusiasm for aviation as a private hobby has waned somewhat after a brief trial. A few cases there may be of course, where a bigger machine is desired. I hear there is a brisk demand for these second-hand machines.

—London Cor. Ottawa Journal.

Progress In Mixed Farming

Dairy Products and Cattle Help To Balance Budget

The great lesson of the crisis is the great consideration of one crop cultivation. If the objection is made that beasts, poultry and dairy products are not fetching a better price than wheat, they do at least contribute in great measure to balance the farm budget by reducing the expense account. Our farming population must learn to be self-sufficient. The measure of progress achieved in this direction will be very profitable and may avert other crises of the kind through which we are now passing.—La Liberté, Winnipeg.

Quality Is Assured

One of the greatest safeguards of value for the farmer is the tag which appears on each bag of fertilizer sold in Canada showing the name and address of the manufacturer, the brand name, the registration number, and the guaranteed analysis. The administration of the Fertilizer Act by the Dominion Seed Branch provides assurance to the farmer that he is getting real value in fertilizer.

Alaska's great piedmont glacier, the Malaspina, consists of ice over a thousand feet thick.

India, last the only country with its untouchables. Just try to borrow a five-spot from a friend these days.

Hard Job For Judges

Testing Legality Of Will Made 100 Years Ago

Judges of the Ohio Supreme Court will determine the legality of the 100-year-old will of Daniel Miles, whose eccentric life forms the strange chapter in the annals of the Cuyahoga County probate court. Should the terms of the will be upheld, ownership of one of Cleveland's leading hotels and an industrial section there would be transferred. Total value of the property involved amounts to several million dollars.

Simultaneously, the income from these valuable properties would be given to a church and to schools. Miles, a member of a wealthy Cleveland pioneer family, died in 1827 at the age of 36, a victim of "coughing sickness."

His will provided that the income from his 40 acres of land in Newburg township, now the present site of the hotel and industrial estate, be given to three trustees and used in educating male members of the Miles family for 100 years.

At the end of 100 years, the will stipulated, the income from the estate was to be divided equally between Newburg township and a Christian church located in the district.

The instructions of the will were faithfully adhered to by the trustees for 11 years following the death of Miles. In 1833, two brothers of Miles filed a suit to dismise the trustees.

While complete court records are wanting, it has been established that Miles' brothers and sisters were given title to the estate in 1841. Five years later, the courts decided the estate should be divided among heirs, with in turn took advantage of a rising real estate boom and disposed of their property.

Nevertheless, the will of the pious Daniel Miles still remains on file, and the Supreme Court has been petitioned to rule on the provision that 100 years from his death the income from his estate be given to religion and education.

Winter Pastimes

Iceless Days Are Near Holidays In Canada

There is a delightful combination of atmospheric conditions and topographical features in Canada which makes life in the open a pleasant experience. Aside from the real enjoyment of participating in the different winter pastimes, the effect toward improving one's health is truly remarkable. The clear, crisp, dry air, and brilliant sunshine of a typical winter's day acts as a tonic for tired brain and body, and it is at this particular season of the year that the mind, both old and young, needs most a period of relaxation to restore the energy expended since last summer's holiday.

Discipline For Prisoners

In dealing with prisoners several factors have to be borne in mind: Society at large has to be protected. The prisoner must be punished. And, so far as is possible, an effort must be made at reformation. While discipline must be strict, the punishment should not be of such a nature that the prisoner will be turned out a more hardened criminal than when he entered the penitentiary.

The Yangtze Kiang is the longest river on earth and 15,000,000 people live on it.

Experience may be defined as something you get when you are looking for something else.—Ottawa Journal.

Mental Patients

Apparent Decrease Due To Greater Per Centage Of Discharges

Increase in patients in Canadian mental institutions during 1931 was less than the increase during the previous year, according to figures issued by the Canadian national committee for mental hygiene. Total number of patients in the hospitals and institutions on December 31, 1931, was 22,000, of whom 26,097 were classed as insane and 5,900 as mentally deficient. Total number on the books on January 1, 1931, was 20,448, of whom 24,948 were insane and 5,500 mentally deficient. The increase during the year was 1,551 which compares with an increase of 1,704 during 1930.

This apparent decrease in the number of victims of mental distress, was not due, however, to fewer cases arriving at the hospitals, but rather to a greater percentage of discharges from the institutions. "As a matter of fact," there were more admissions in 1931 than in 1930. There were 10,000 persons admitted to mental institutions in 1931, while in 1930 the number was only 8,869. Discharges numbered 6,488 in 1931, as against 6,281 in 1930. For every 100 patients admitted in 1931, 59.1 were discharged, and for every 100 patients discharged, 26.5 were discharged as recovered.

The chronic condition of overcrowding, which is a constant feature of mental institutions, is of course, aggravated more greatly by the fact that additional persons have been forced into them, while the total number of new beds provided is probably less than the number of persons who are bound to follow unless governments take immediate steps to supply accommodation equal at least to the annual increase in institution population.

Expedition To Jericho

Scientists To Explore Ruins Of Royal Palace

Professor John Garstang and Sir Charles Marston are to continue their excavations at Jericho this week to ascertain further facts about stories related in the Bible. Professor Garstang will depart for Palestine this morning. Sir Charles Marston will accompany him, or go later. They have four expeditions to Jericho in the last four years.

The royal palace is the most important building on the whole site," says Sir Charles. This will be their objective this time.

"Its massive walls rise 60 feet above the surrounding ruins. We have already explored some of its store-rooms and have found bags of grain well preserved."

"It is significant that the whole palace was destroyed by fire when it was still occupying. The time was that of Joshua and our discoveries agree with the Bible story. The forthcoming expedition is going to work particularly hard to dig out some cuneiform tablets which may be stored away in the cellars."

"The most interesting result of the excavations at Jericho is the fact that when the city was captured and burned, it was not plundered. And this is exactly as described in the Bible story."

Few people can realize the difficulty of the spade work at Jericho. The heat is terrific and reminds one of a mild Turkish bath.

"Owing to the splendid road built by the armies in the World War, Jericho can now be reached by car in an hour from Jerusalem. The journey starts at 2,500 feet above sea level and finishes at 1,800 feet below sea level."

The Kind She Knew

The mistress was giving the new maid fresh from the country a list of household requirements.

"There you are, Alice," she said, and then suddenly remembered an item she had almost forgotten. "Oh—er—don't forget we shall want a new griller for the kitchen too."

Allice Stared Vaguely

"Don't you know what a griller is?" asked the other, sharply. "I should say I do," replied the maid significantly. "It's a big hairy monkey, the size of a man."

From The Scientific Union

"The movement for the promotion of scientific co-operation within the empire is substantial and far-reaching," declared Lord Benborough, Governor-General of Canada, addressing the Royal Canadian Institute in Toronto. Lord Benborough's subject was "Scientific Union Within the Empire."

The city of Omsk, in Siberia, following the example of Peter the Great, imposed a tax on beads in 1929.

FANCIFUL FABLES

Winter Sports In Canada Are Attracting Increasing Numbers Of Visitors To Dominion

The invigorating climate of a typical Canadian winter, now regarded as an advantage rather than a hardship, owing to the unusual variety of healthful and appealing sports, is attracting increasing numbers of visitors to the Dominion.

Across Canada there are many beautiful and attractive snow-covered mountains, hills and valleys, which offer exceptional opportunities for enjoying a wide variety of outdoor winter sports. The principal activities throughout the country are skiing, snow-shoeing, skating, tobogganing, curling, hockey, bob-sledding and

but a preference is shown for hockey and curling. In the province of Quebec the major sport events centre in and around Montreal, Quebec City, Murray Bay and the Laurentian mountains. Lovers of winter sports will find vast territories in Ontario which are ideal in location and in scenic beauty. Ottawa, the federal capital, is adjacent to some of the finest skating country on the continent, while the best of ice-yachting may be enjoyed in Toronto Bay and along the waterfront of Lake Ontario. In the Muskoka and Algonquin Park districts, hotels and cabins are open for the accommodation of winter visitors.

dog derbies, all of which may be thoroughly enjoyed, under ideal conditions. With the exception of an occasional day during mid-winter, the temperature is not too cold, for participating in outdoor sports.

While motor travel is not general during the winter season, there are many long stretches of highway which are kept conditioned throughout the winter months. The traveller will always find train service a modern and luxurious means of transportation. Hotels in many of the leading summer resort districts remain open the year round, providing good accommodation for those wishing to participate in local winter events.

Each province possesses winter attractions more or less peculiar to its own particular surroundings. Practically all forms of winter sport are available in the Maritime Provinces.

Craze Of Earlier Day

Netting Was Amusing Pastime and Still So

This being a knitting era as far as necessities and luxuries are concerned, it reminds one of an earlier day when the craze was netting. The shuttle, or netting-needle, was very expensive in the 18th century, and the pastime an amusing one. Women used this dainty tool in making a kind of narrow lace known as netting. Today we would call it fishing.

This gave fashionable women an excellent opportunity to display dexterity and beguiling hands. Knitted netting needles cost as much as \$40 in some cases. The Marquis de Pompadour had a pair that cost \$27.50, and the Comtesse de Provence gave Mme. de Beaumont a gold netting-needle decorated with a miniature painting worth a fabled sum. The estate of the Duke of Lorraine was found to contain, on his death, in 1781, seventeen netting-needles in amber, rock-crystal, gold, mother-of-pearl, agate, petrified wood—all set in gold.

Apple-Or Oranges

Apples are a luxury when it comes to marketing them, and though the Canadian yield this year was good there is a falling off in the export demand of nearly 500,000 boxes as compared with 1931. We can indulge in a baked apple for breakfast instead of a foreign-grown orange, and be the better for it.

A farmer handed over three cows to his father to settle an old debt. Paying in kind?

Conterfeit half-crowns have been found circulating in Auckland, New Zealand.

THE JUMPER DRESS HOLDS MUCH JOY FOR SCHOOL GIRL

Isn't this one fetching? It's very gay too! The dress is brown woolen. Yellow and brown plaided woolen is used for the separate gumpie. Note how it buttons down the back. It can also be worn with a white fine woolen, tomato red woolen or yellow cotton ballets gumpie, offering many changes to the wardrobe. It's very simple to fashion it. And it requires the minimum of material.

Style No. 83 is designed for sizes 4, 6, 8 and 10 years. Size 8 requires 1 1/2 yards of 36-inch material with 1 1/2 yards of 36-inch contrasting. A cunning idea that is exceedingly smart is a twoed mixture in red tones with plain lining wool crepe gumpie. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap circle carefully.

One's Place In Life

Having a place in the world is one thing, but being in one's place in the world is quite another thing. There is a place for every man, but not every man is in his place. And the man who is out of his place in the world is out of place in the world. If a man would prove his right to be in the world, he must show that he is in his place as well as in the world.

A shoe factory has been opened in the military barracks at Dundalk, Irish Free State.

This spectacular picture, made during the 100-mile race for the championship of the United States at Oakland, California, shows an accident at the instant it happened. The car, driven by Les Spangler (nearest the camera), is shown as it sidwheeled another entry, as both were going at a terrific speed on a turn. Spangler's car hurtled completely over, but the occupants escaped with comparatively minor injuries.

Weather Forecaster Dead

Prophecies Of Chicago Man Caused Many Wagers

The familiar phrase "no bets with Barrett" will no longer be heard on the Chicago Board of Trade. The picturesque John F. Barrett is dead.

Barrett, considered the city's most accurate amateur "long-distance" weather forecaster, died recently after a brief illness.

He won numerous bets from his friends on the board by his successful weather forecasting. In 1931, he won \$1,200 on his predictions. Barrett said there would be no zero on the thermometer from December 1 to March 21. He was right.

As a matter of fact, he was right so many times that the "smart boys" decided lay were licked. There were no more "takens" and the "no bets with Barrett" was frequently aired.

Barrett's weather prophecies were watched closely. It was a frequent occurrence to note in local newspapers what "Barrett, Chicago's unofficial weather-man," predicted.

A recent check-up on his forecasts, that extended over a period of more than 10 years, showed him to be correct 85 per cent. of the time.

Although 73, Barrett was one of a small group who had held continuous membership on the Board of Trade for 50 years or longer, having become a member of the exchange April 1, 1861. He was a director of the board 1907-09.

The "weather prophet" was known as a "wise" buyer of cash grain. His skill in forecasting the weather and the size of the future grain crop aided him in business dealings.

While many grain operators looked to Barrett for "tips" on the weather, there were a few who figured his forecasts only lucky. A few bets, however, convinced them otherwise.

Barrett's success was attained by developing a system of observing the course of the wind in Embury cove, a period in the Catholic Church Calendar.

Promiscuous Shooting

Accidents During Hunting Season Each Year Are Appalling

Has any man any right to fire a shot without knowing what he is firing at? The tragedy which has haunted the woods this Fall is almost unbelievable in its magnitude and its carelessness. A man is shot, the shooter looking him for a partridge.

A man is shot, the shooter mistaking him for a bear. A woman is shot, the sportsman thinking he was firing at a moose. An ox is shot in mistake for something else. A man was shot as he went into the woods to draw his cattle home. A man moves the bushes and a shot brings him to the ground, the shooter firing at the moment in time when the moose was about to charge. And so the tragic story unfolds itself, day after day, the wires bringing in their tale of death and wounded.—Haltfax Chronicle.

Waiting For Proof

An Egyptian mummy, said to be 2,000 years old, has arrived. Crocydon by far from Holland, for delivery to an antique dealer in London. The customs, however, cannot release the mummy until they have received a declaration from the doctor that it is not less than 100 years old. The declaration has to be signed in the presence of the British consul-general in Holland.

And if you don't think Professor Piccard flew clear out of the dictionary to find the word stratosphere.

British Polar Year Party Tells Of Work Accomplished At Their Bear Lake Station

Interesting Old Records

British House Of Commons Has Wonderful Reference Library

The library of the British House of Commons today is well stocked with history, political biographical and law books—some of the best reference libraries of its kind in the world.

Yet 100 years ago, two years before the Palace of Westminster, the old Houses of Parliament, was burnt down, a committee was appointed to look into the affairs of the library. Among other things, they discovered a "post-office bag" of unopened letters of the year 1680, so much for constituents who wrote to their members in those days. For the rest not even a copy of the Acts was bound in the library, and valuable space was given up to books which had no bearing on political matters.

The library contains some interesting old records saved from the fire. Among them the official journals, records of debates and procedure, which until 1742 when they were printed were presented written in the recording clerk's hand. There is the record of Cromwell's famous descent on the House when he dissolved the "Rump," and another records the visit of Charles I. to arrest his five sons. Both these entries are in so shaky a hand as to indicate plainly the clerk's agitation.

Advice For Piano Owners

Tone and Condition Depend On Where It Is Placed

In deciding where to put the piano, both tone and condition have to be considered. A rug under a piano tends to deaden the sound. If possible, it should stand on bare boards, or, if the rug goes all over the room, wooden insulators set under the castors. Tense is also lost when an upright piano stands back against a wall. Set it at an angle, or pull it out two or three inches from the wall.

Special precaution must be taken against damp. A piano should be kept in a warm, well-aired room. Placed close to a window, or against an outside wall, a piano is exposed to damp air. Strings become rusted and the glue of hammer felts is loosened. A little charcoal laid at the bottom of the case inside the lower front panel is a good protection from damp. Moths in the hammer felt can be guarded against by hanging little bags of camphor or cedar chips inside.

Ivory keys turn yellow if the keyboard remains shut up, so leave them exposed to the air as much as possible. They may be whitened by rubbing them with a soft rag dipped in lemon juice. Scaled keys are easily cleaned with methylated spirit.

Don't put up with a squeaky pedal; a touch of blacklead will cure this.

Easily Recognized

The ropes in the English navy, from the greatest to the smallest, are so twisted that a scarlet thread runs through them from end to end, which cannot be extricated without undoing the whole; and, by which the smallest pieces may be recognized as belonging to the Crown.

Aviation in all its forms is popular in Germany this year.

Writing From Fort Rae, North West Territories, J. M. Stagg, leader of the British Polar Year expedition party, has sent out a description of the safe arrival of the party and their work during the first few weeks at their station on Great Bear Lake. The party will stay, among other phenomena, the Aurora Borealis or northern lights.

The British party were interested to see the Canadian Airways Service taking prospecting parties up to the recent finds of pitchblende, gold and silver on the southeast shore of Bear Lake, 200 miles further north than Fort Rae, but the British party gave the novel thrill to the Indians of sending up balloons daily. As it happened that they had an unusually long rainless period in August, the Indians connected it with the occult influence of the balloons, and when a thunderstorm came with a lightning flash to ground near the settlement, nearer than they had ever seen one before, the Indians were confirmed in their belief that the strange visitors were practitioners of magic.

Looking forward to being frozen in for about nine months, with a vast programme of scientific investigation to be carried out, the party carried a lot of impedimenta. Their instruments and food equipment for six weeks was in over 600 carts. They were provided with living quarters by the Hudson's Bay Company and the Royal Canadian Mounted Police, but the fact that the Indians shake into laboratories and observatories. One shack had to be made light-proof, heat-insulated and sound-proof to the use of hydrographically recording magnetic instruments by building a double-walled chamber with wood-wool in the interspace and then fitted with a double door, and filled up with turf and musk-ox skin.

Another old log was fitted for the mounting of hydrogen and the filling of balloons. A third had to house the engine generator and storage for the use of the numerous lighting of the photographic recording instruments. Another but became the main meteorological observatory and

As early as July the investigators had the pleasure of noticing the aurora and during August there was a display every evening. As all the magnetic recorders had been put in working order, observations were made from the start and Mr. Stagg writes with evident gratification: "It was most near, but not actually inside, the zone of maximum auroral activity."

Dry Canadian Snow

Shows Of Winter Are Dry, Soft, and Fluffy

Some sections of the world profess to have such a climate that their rain is dry rain, and for the most people a statement of this nature is hard to believe. Canadian snow, however, is not dry rain, and for the most familiar with flakes that fall and immediately turn to a dull grey and sodden mass. In the greater part of the Dominion the snow of winter is dry, soft and fluffy, not doing to one's garments, and even after a day of play in the open, sking, or sliding on Nature's white cushion, a slight shake or brushing removes all trace. So dry is the snow that at times it is impossible to mould the crystals into a snowball.

Bird Sanctuary

Shashobhan Farmer Has Fine Flock Of Hungarian Partridge

Pillmore, Sask., boasts a "Jack Miner" in the person of John Bell, who is building up a bird sanctuary on the farm of his brother, Frank Bell, one mile west of Pillmore.

Last fall, a little over a year ago, Mr. Bell began feeding a couple of Hungarian partridge. The couple has now grown to a flock of 22 and this fall 75 more joined the group. A very fine grove of maple and aspen in the yard, close to the buildings, provides shelter and protection for the birds and in this security and with the kindly care of their guardian the birds are becoming very tame.

It's funny, but a woman who can spot a blonde hair on your coat at ten paces can't see a pair of garage doors at all.

The human brain is truly a marvelous thing. It starts working the minute you wake up and never stops until you get to the office.

RELIEVES COLDS WITHOUT "DOSING"

WORLD HAPPENINGS BRIEFLY TOLD

Political considerations will be cast aside in the selection of men for the tariff board, Premier R. B. Bennett promised the House of Commons.

Friend of Louis Riel and the man who brought the rebel's body to Winnipeg for burial after his execution in Regina, in 1885, Arthur Suave, is dead in his 73rd year.

A total of 187 Japanese and one Chinese were admitted to Canada from June, 1931, to November 1, 1932, according to a return tabled in the House of Commons.

Abbott Lawrence Loebl, 76, one of the world's noted educationists and for the past 23 years president of Harvard University, has resigned. No reason was given.

Liquor revenue for British Columbia under the government liquor board for this year is set at 40 per cent., according to a preliminary report compiled by government auditors for the information of the cabinet.

First shipment of its kind, some 12,000 tons of Russian fuel oil arrived at Montreal recently. Since September three shiploads of crude oil from Soviet Russia reached the Montreal port.

A group of Harvard undergraduates have begun organization of a permanent "Harvard League of Nations," in which students from all countries represented in the university would have membership.

Nine sleek Alaskan sled dogs headed out of Copper Center, Alaska, on November 20, on route with their driver, Clyde Williams, veteran of 31 years of prospecting, trapping and mushing in the northland, on an overland trip to Chicago.

Canada gave whole-hearted support to any and every constructive proposal for the limitation and reduction of armaments which was laid before the Geneva disarmament conference. Sir George Perley, who headed the Canadian delegation, informed the House of Commons.

Men in New Business

Confend There Is Room For Them As

Manufacturers

Entering a field hitherto belonging exclusively to women, six Edmonton young men have finished training as manufacturers. And they're deadly serious about it.

The head of a prominent school of beauty culture in the east gave them their training. Economic conditions forced them into this experiment, but they don't intend to compete with women manufacturers. There's room in the field for both, they say.

Had No Representative

Women Cannot Be Blamed If Imperial Conference Made Mistakes

If the recent Imperial Economic Conference at Ottawa made mistakes the women of the empire cannot be blamed. So contends Canada's only woman senator, Hon. Cairine Wilson, addressing the annual banquet of the Ontario Liberal Association. Senator Wilson called attention to the fact that not one nation taking part in the conference had a woman representative or a woman adviser.

Recipes For This Week

(By Betty Harwick)

NUT BROWN PUFF

- 1 cup crumbled graham crackers
- 1/4 cup sugar.
- 1/4 teaspoon salt.
- 3 cups scalded milk
- 4 egg yolks, beaten.
- 1/2 cup nut meats chopped.
- 1/4 teaspoon almond flavoring.
- 1/4 teaspoon vanilla.
- 4 egg whites.

Mix crumbled crackers, sugar, salt and cover with scalded milk. Stir into beaten egg yolks. Add nut meats and flavoring and fold in stiffly beaten egg whites. Pour into buttered baking dish. Bake in a moderate oven (350 degrees Fahrenheit) 35-40 minutes. Six portions.

ORANGE CANDIED SWEET POTATOES

(Serves 6)

- 1 cup orange juice.
- 1/4 teaspoon grated orange rind.
- 1 cup water.
- 1/4 cup sugar.
- 3 tablespoons light corn syrup.
- 1/4 teaspoon salt.
- 1/4 cup butter.
- 6 to 8 sweet potatoes or yams.

Combine first 7 ingredients and pour over peeled uncooked sweet potatoes arranged in casserole or baking dish. Bake covered in a moderate oven (375 degrees to 400 degrees Fahrenheit) until tender, 30 to 40 minutes. Baste occasionally. Remove lid last 10 minutes to brown or put under broiler.

Variation: Just before removing from oven, add a layer of marshmallows and brown.

Russia estimates that its present population is 127,000,000.

England has twice as many women as men over 86 years old.

+ Do You Know? +

—Photograph Canadian National Railways.

THAT in many parts of northern British Columbia the Indians, in addition to erecting totem poles to commemorate the deeds of some members of the tribe, also build grotesque figures to frighten from the villages such evil spirits as may wish to harm upon its inhabitants? Here is pictured one of the animals—a mountain lion perhaps—at Kitwanga in northern British Columbia.

SUNDAY SCHOOL LESSON

DECEMBER 4

LIVING WITH PEOPLE OF OTHER RACES

Golden Text: "Of a truth I perceive that God is no respecter of persons."—Acts 10:34.

Lesson: 1 Kings 8:41-43; Luke 10:25-37; John 4:3-10; Acts 10:19-28, 35, 37-38.

Devotional Reading: Luke 10:30-37.

Explanations and Comments

Jesus Was No Respector of Persons, John 4:3-10.—We have in this lesson the example of Jesus in dealing with a representative of another race. This was our text for the Fourth Lesson of the First Quarter, and Explanations and Comments there may be recalled.

The world menace of interracial friction and antagonism constitutes the supreme concrete challenge to the Christian belief that all men are the children of God.—Basil Matthews.

The Lesson Peter Learned About Other Nations, Acts 10:34-35.—While praying on a house top in Joppa, Peter had a vision of a receptacle resembling a great sheet let down from heaven by its four corners, and in it all manner of four-footed and creeping things and birds, and he heard a voice bidding him kill and eat. Horrified at the thought, Peter exclaimed: "Not so, Lord, for I have never eaten anything that is common or unclean." The Levitical law prescribed what animals could be eaten and how they should be slaughtered, and all else was held to be unclean.

What God had cleansed, made not unclean, were the words the voice uttered to the astonished Peter. Peter had not made a distinction between clean and unclean, but he had made a distinction between the clean and the unclean. The Levitical law prescribed what animals could be eaten and how they should be slaughtered, and all else was held to be unclean.

Steamers Missed Rock Through Good Luck

Found Near Surface In Channel Of Vancouver Coast

Lady Luck has been standing on the bridge of every steamer that has navigated Riel's Cove, Claycoyout Sound, West coast of Vancouver Island, because in the dead centre of the channel there is a pinnacle of rock that had less than fifteen feet of water over it at low water.

This pinnacle was located by the Dominion hydrographic steamer "Lillock" in the course of her charting work and a lot of mariners are shaking hands with themselves at getting over that dangerous spot without trouble.

How ships missed piling up on this rock is explained by the hydrographers, that none happened to be in the neighborhood at low water, "Just a matter of luck," said one of the hydrographers.

A Pocket Sheep-Shearer

Small Machine Can Run From Lighting Battery Of Car

A small machine for shearing sheep weighing only five pounds, has been invented for use with the lighting battery of a motor car.

A modern shepherds in Britain go to and fro by car, and with such a shearer—attached by a flexible wire to the car's battery—they can remove 12 pounds of fleeces in five minutes.

Plenty In A Name

What's in a name?

"Plenty," said Detective Thomas Hennigan and a New York Central railroad engineer, who was forced to stop his train, climb from the cab and help above an automobile from the railroad tracks where it apparently was abandoned. The automobile was parked on the track by a man named Leavitt.

A forestry course for army recruits has been instituted in Norway.

CHAPTER 11.
A No North Man
At Fort Endurance, in his big three-roomed cabin overlooking the rest of the post, Alan Baker was changing uniform and making himself regimental again, after a four-day patrol to a camp of drunken harpies.
Just turned thirty, tall and lanky and powerful of build, Baker had shaken off the last vestige of his unhappy boyhood and his three harrowing years across. He was in the prime of virile and hardened manhood. Come here to Endurance as a corporal seven years ago, with Jimmy Montgomery and Curt Spaulding as his constable, he had speedily shown his worth as a "northern man" and a detachment leader able to cope with frontier problems. To him it was like coming into his own. In his boyhood he had dreamed of hunting big game—saw more, at this post just beneath the Arctic circle, these dreams had been realized, though in a strange way. For here he had hunted the biggest of big game of human game that had intelligence to match against his; that carried a rifle in its hands, and wore a belt-gun, and must be captured alive, at risk of his own life.

During the years that he had been officer commanding here, he had built up an enviable reputation. With his gradually increasing pack of northern men he had successfully fought his big territory through Indian troubles and epidemics, and subdued those lawless elements that came in with the oil-prospecting rushes farther south.
With a record like that and with Superintendent Williamson as his friend, Alan had expected to get his commission last fall when the post was raised to an inspectorate. A political appointee named Haskell, a new recruit to the Force, a worse than raw newcomer to the North, got the appointment and command of this coveted detachment.

In these last months, Alan had been very thoughtful about his future. Here, at thirty, he found himself in a blind alley, a non-com on meager pay with no hope of promotion. He had turned down the opportunity of going into a big mining company that was prospecting by planter through Athabasca country. He had refused half a dozen offers that held prospect of advancement and fine money. And then the Force that he had given such loyalty to had betrayed him. Worst of all, most stinging of all, he was forced to manage this territory still, straight-

ening out the mistakes and enduring the arrogance of the man who had got the place he himself had earned.
As he brushed his sandy hair and dressed quickly, Alan's glance strayed down the slope to Mrs. Drummond's flower garden. Elizabeth Spaulding, his fiancée, the sister of his dead partner, was there.
And Inspector Haskell was there with her. . . that blue and gold of his uniform, through the shrubbery . . . Alan wondered how many hours Haskell had spent with Elizabeth in these last four days.

Commanding all the other buildings at Fort Endurance, Alan's cabin, which he and Curt Spaulding had built for themselves one summer, was light and airy, homelike with fireplace, bookshelves, radio, flower pots on the ledges; and comfortable with good furniture which Jimmy Montgomery had turned over to him when Jimmy's young wife died. But in spite of its comforts after barracks life, the cabin was lonely to Alan. Eighteen months rolling by had not made him forget a dead partner. Every log and every nail in the building held some memory of Curt Spaulding; and Curt's picture, his chevron, his empty gun, were poignant reminders of that fatal patrol a year ago last January.

When he finished dressing, Alan stepped over to a deep alcove, a sort of library and study—a tiny niche for a man so tall and lanky. Above the table hung a shelf of dog-eared books and three pictures framed in carved walrus ivory. One was of Elizabeth Spaulding taken two years ago when she came down north to this Wateryways country to live with Curt, her brother. Another was of Jimmy Montgomery in jaunty "walking-out" uniform, taken before Jimmy got his red wax from headquarters and bought out of the Mounted. The third was of Curt Spaulding. And that picture, flanked with the chevrons and the belt-gun, hung more prominently than even the other two, in the room, with the face always in front of him. Alan felt less lonely for his dead partner and could imagine Curt here in this cabin still.

When he finished dressing, Alan stepped over to a deep alcove, a sort of library and study—a tiny niche for a man so tall and lanky. Above the table hung a shelf of dog-eared books and three pictures framed in carved walrus ivory. One was of Elizabeth Spaulding taken two years ago when she came down north to this Wateryways country to live with Curt, her brother. Another was of Jimmy Montgomery in jaunty "walking-out" uniform, taken before Jimmy got his red wax from headquarters and bought out of the Mounted. The third was of Curt Spaulding. And that picture, flanked with the chevrons and the belt-gun, hung more prominently than even the other two, in the room, with the face always in front of him. Alan felt less lonely for his dead partner and could imagine Curt here in this cabin still.

"If I'd Rapine Him, He'd—He'd Take It Out on You!"
In Curt's death he had lost the best and truest friend he had ever had or ever would have; and he knew that through all the years of his life he would be lonely for that strong handclasp and a voice he once had known. From a pigeonhole between two logs—a secret mailbox for himself and his hard-working men—Alan pulled out a scrawled note from Corporal Bill Hardcock. He had to smile as he read, for the note was so like Bill.

"Somebody found an awfully dead smoky on a mud bar down river to the side the Big Alaska, Alan. He probably got drowned in the break-up but I'm going down to see who he is. He won't be drinking, treating money by proxy for the next 20 years."
Alan sat down to write out the report of his last patrol. But his thoughts strayed to Elizabeth in the garden; to Haskell, there with her. He knew that these trips he constantly went on, these trivial assignments that took him away for days at a time, were deliberate on Haskell's part, to get him out of the road. With this in mind, Alan's thoughts came to him, he thought: "If Haskell could think within a mile of managing this post himself, he'd frame some detail to keep me in the bush altogether."

Any person who would his official power in a personal matter like this. . . They used to cut off a knight's gaze with an axe."
There was little passion in Alan's emotions toward Elizabeth, but there was a sturdy loyalty and a certain devotion to her as a girl. In that fatal patrol he and she had suffered a mutual loss of partner, brother. During the eighteen months since then, he had been her only friend here at Endurance, for even Mrs. Drum-

mond, with whom she was living, did not like her. To have a girl so dependent upon him, not only for friendship but for maintenance itself, aroused a very tender and protective attitude in Alan.

But at times, deep in his heart, he was troubled about his engagement to Elizabeth. At times the fear rose in him that their marriage was going to be a terrible mistake. Something lacked in their betrothal; they weren't the deep and intimate friends they should be.

It shocked him to realize he was going into marriage with a girl knowing he did not love her wholeheartedly. In brooding hours, when he thought of another girl in his life, of Joyce MacMillan and his comradely intimacy with her, the old longing for that deeper and richer relation surged through him. He grew bitter at the secret powerful circumstance which had separated him from Joyce, which he kept locked within himself, telling no one, neither Joyce nor Elizabeth.

Father Claverly, alone, of all the people at Endurance, knew that there was something back of that engagement which Alan had kept to himself—some hidden reason, some unalterable fact, that would explain it. At first he had thought that the profound shock of a partner's death had caused Alan to turn to Elizabeth; but with the passing months he became convinced the reason was not that. It was something deeper and more lasting.

With infinite sorrow Father Claverly had seen Alan's fine comradeship with Joyce break up and had watched the engagement come about. He saw that Elizabeth was a wise, cool-headed girl, very clever at managing relationships for her own ends in the good priest's opinion the marriage of the cool-headed, calculating girl to a man so sincere and warm-hearted, would be a sorry, sorry pass.

When Elizabeth came in the door, she merely nodded to Alan's warm greeting. In her precise tones she said:

"I want to talk to you, Alan, about something very important to me both. Unless you're too busy."

Her rebuff hurt Alan. Her coldness, her lack of any passion, were always bewildering to him.
Waiting patiently, aware he could never answer her arguments, he glanced out the window at the river and the six-winged gulls flying down the broad Mackenzie a canoe, a small patrol craft with outboard motors whipping around a bend.

Alan thought: "That's Bill Hardcock coming. And coming wide open. Something's happened."

Elizabeth saw the craft, too. But she glanced only once at it, entirely uninterested. Police work—patrols, arrests, map surveys, treaty money, points to be stamped, bickering Indians—all this bored her, now that the novelty of it had worn. She loved Alan with reservations. She admired his natural-born leadership over other men; admired his rugged honesty, especially in contrast to Haskell's lack of it. In their life together Alan would always be loyal to her; she could always depend upon Alan. But he could not tell her what she wanted of life. Much better than he himself did, she realized he had qualities that would take him far in any other profession; a good intellect, ambition, the ability to work hard, and—most valuable of all—a rare capacity for friendship.

All in all, Elizabeth felt that if only he did not choose to bury himself here in this northern backwoods Alan Baker was by far the likeliest man, of the four or five she had known well, to lift her out of genteel poverty to a more agreeable plane of life.

(To Be Continued.)

Dorman Kins Job
The show had started, and Mr. and Mrs. Berry, invited guests of the great show, refused to leave the exhibition by the obdurate doorman. "But," they protested, "we are the Berry's!"
"Sir and madam," spoke the guardian of the door, whose knowledge of slang was as high, "you couldn't get in here without tickets even if you were the cat's whiskers!"

Many mine strikes have been reported in Scotland this year.

THE RHYMING OPTIMIST
By Alice Michalske
THE TEACHER
There's much to learn from laughter
We could not learn from sighs.
For mirth is life-making
And radiant rays skies.
And laughing lips are wisest;
But don't forsake a wing
Long after colder learning
From out our thoughts has died.
Oh, laughter, merry teacher,
Do not forsake us long
But bring our ways to brighten.
Your younger brother, Song!
There's much to learn from laughter
That tears could never give,
For laughter lifts the courage
A fuller life to live!

See Better Business
United States Advertisers Report
Increased Sales
Sales increased approximately 23 per cent in the last three months over the three months immediately preceding, on the basis of reports from more than 50 per cent of the members of the Association of National Advertisers, the annual convention of the association was held at Atlantic City by Lee H. Bristol, of New York, president.
A large percentage of the increase, he said, was attributable to improved conditions in the trades reporting the rise.
Bristol further revealed that 35 per cent of the concerns represented at the convention have planned to increase their advertising expenditures in 1933, while only 22 per cent have planned to decrease these expenditures.

Little Helps For This Week
"Perplexed, but not in despair; cast down, but not destroyed."—Psalm 94:19.
Discouraged in the work of life, disheartened by its load,
Shamed by its failures or its fears
I sink beside the road.
But let me only think of Thee,
And then new heart springs up in me.—S. Longfellow.
Never let us be discouraged by ourselves; it is not when we are conscious of our faults that we are the most wicked; on the contrary, we are less so. We see by a brighter light, and let us remember for our consolation that we never perceive our sins till we begin to cure them.—Pension.

Canada's Fur Industry
Industry Rapidly Expanding Through-out the Dominion
Despite the fact that the number of fur farms in Canada increased over one thousand to a total of 6,524 for 1930, the total value of investment in land and buildings, \$5,583,546, was \$5,000 less than the preceding year and the value of fur-bearing animals at \$18,197,747 was \$5,000,000 less than the value in the preceding year. The fur industry is rapidly expanding throughout the Dominion and much valuable assistance to it is given through experimental and research work carried on under the direction of the Dominion Department of Agriculture.

Developed By Chinese
Grapefruit Was Hardly Edible Three Thousand Years Ago
Grapefruit which is now such a popular article of diet, was developed by the Chinese some 3,000 years ago from one of the wild citrus trees with which their country abounds, and whose natural fruits are small and hardly edible.

Aluminum is more abundant
throughout the world than any other metal. It forms about eight per cent of the earth's crust.
Rents have risen 70 per cent in Copenhagen since 1916.
Bones of the average man weigh 20 pounds.

The Oyen News

Buy Alberta Made Goods

The cold weather of the last two weeks came to an end Saturday when a Chinook wind commenced to warm things up. On Sunday the thermometer registered 48 degrees and has stayed above the freezing point till this evening when 30 degrees above zero, was the lowest point registered.

The forecast for tomorrow is

mild, and colder weather expected.

An epidemic of flu appears to be running its course in the district just now. Homes that are free from sickness are the exception rather than the rule. With colder weather, it is expected that more rapid recovery will be made by those who are now indisposed.

About Town and Country

Mr. Walter S. Marshall left last Sunday, headed north on his annual big game hunt. While no definite plans as to the duration of his stay in the wilds, had been made, he does not anticipate being back till the end of the year or the first week in January.

Mr. S. L. Kline, also left last Sunday for the north, he will probably join Mr. Marshall in his hunt for big game.

Mr. Wm. Walsh, who was a Calgary visitor last week, returned to Oyen, Monday.

Mr. R. Cates, who was a Calgary visitor last week, returned to Oyen, yesterday morning.

Mr. Wm. Cunningham had the misfortune to lose his home last Monday. The house was destroyed by fire during the noon hour. The blaze is believed to have started from an overheated stove pipe. Very few of his effects were salvaged.

Rev. and Mrs. C.M.K. Parsons have been spending a few days in town.

Leonard Harris and Chester Tupper returned home last week after a three week's hunting trip north-west of Edmonton.

Mr. Fred L. Warncke and Mr. A. Arneson left last Monday for Calgary, where they will spend a few days on business.

The W. A. of All Saints Church are having a sale of work and afternoon tea, at J.B. Lowe's store, Saturday, December 3.

Public Meeting in Oyen Theatre

(Continued from page 1)

and clearly, how various industries could expand and provide more employment if the people of the province would give preference to Alberta made goods when making their purchases. Mr. McKay stated that he was not merely trying to boost Alberta manufacturers. We possibly could not do a great deal in a large way to help to solve the depression problem, but we could do something; and in helping Alberta manufacturers, we could help the Alberta unemployed, and if we could get more men back to work and off relief, we would be doing something worth while. No one industry could be helped, without some good coming to other industries and individuals, he stated.

Toward the end of his address, Mr. McKay made reference to the display of Alberta made articles, which were artistically arranged at the front of the stage and invited his audience to examine the exhibit at the close of the meeting. He was given a very hearty ovation at the conclusion of his address.

Lorne Proudfoot, M.L.A., suggested that our currency be deflated by going off the gold standard. If this was done he believed that a big step would be taken to help right conditions. He thought the government at Edmonton, should be more lenient in collecting land payments, and criticised the phrasing of letter recently sent out by the department.

Mr. Geo. A. Morrison, mayor, occupied the chair and introduced the speakers.

In the evening Mr. McKay addressed a meeting of business men of Oyen and surrounding towns.

Say you saw it in the News!

Excel Items

Excel Curling Club has completed the President vs Vice-President event the result being a win for the presidents side.

Several games have been played in the Cup Knock Out Event and a few games in the Square Draw. Warm weather has stopped curling for the present.

The club are putting on an Open Bonspiel, two events, beginning December 5, at 9 a.m. Entries to be in Saturday, December 3, to C. A. Bishop, Drawmaster.

Miss McDonald, Excel school teacher, will hold a progressive card party at the home of Mr. and Mrs. H. L. Bishop on November 30, to aid in the Christmas tree fund.

Messrs F. Waldo, R. Waldo and F. Huston who accompanied by two others, have been north hunting, have returned to their homes. The party were successful in bagging three moose.

Leon Waldo young son of Mr. and Mrs. F. Waldo is home from Ceres Hospital where he was operated on for a Depressed fracture of the skull resulting from a fall several weeks ago. Leon also broke a wrist at the same time. He will be confined to his bed for several days.

M. D. Bertawan

The Council of the Municipal District of Bertawan met in Sibbald on Saturday, November 12, at 2 p.m.

Present: Reeve Mowers, Councillors: Hunter, Meade, Musser, Stauffer and Wilson.

Moved, Meade: That the offer of \$100.00, with \$300.00 cash and \$100.00 in November 1933, received from T. Ford for the West half of S. 28-3, W of 1, be accepted, subject to the approval of the department, and subject also to a stipulation that the land be rented for the year 1933 to D. P. Chalmers on the same conditions as he had rented from the Manufacturers Life.

Moved, Stauffer: That Mr. A. R. Moore's offer to pay the taxes each year on the East half of 20-28-3 for the use of it, be accepted, and that he be

IN LIGHTER VEIN

Moved, Mowers: That the Secretary and Councillor Meade attend the Municipal Convention as delegates.

The Secretary was instructed to call at the Land Titles Office when in Calgary, and endeavor to obtain a compromise on the Seed Grain liens registered against the S.E. of 12-29-1, W of 1.

The Bailiff reported on certain collections made, and asked for instructions on other matters.

Moved, Mowers: That certain oats in the hands of the Bailiff be sold for 18¢ up to January 1, and 20¢ per bushel after that date.

The following accounts were passed for payment:

Dr. Edgar \$35.00, A. C. Hoening \$30.00, C. Greenway \$28.50, Brand Recorder \$4.00, Beaver

Lumber \$5.70, Municipal Association \$20.00, Land Titles Office \$15.00.

The following workbooks were passed: Division No. 1 \$83.00, Division No. 5, \$90.00; Division No. 6, \$401.00. Road Inspection \$52.00.
